JURA Professional

More coffee aromas, more user-friendly:

JURA presents the X4 professional automatic coffee machine

Niederbuchsiten, ###.##.##### – The X line represents a range of robust, all-round professional automatic coffee machines from JURA. The company will be launching the X4 in early summer 2024, replacing the previous X6 model. Some of the most important changes made include the technically improved grinder, the One-Touch Lungo function for longer speciality coffees and compatibility with the MDB standard.

Equipped with the second-generation Professional Aroma Grinder (P.A.G.2), the X4 performs three JURA brewing processes. With the One-Touch Lungo function, americano specialities, such as lungos with their characteristic aroma and mild taste, are also possible. The use of 3D brewing technology, which involves water flowing evenly through the freshly ground coffee at multiple levels, has further improved the popular café crème, while a more intense espresso is possible with the Pulse Extraction Process (P.E.P.®).

Designed with the user in mind, the X4 prides itself on functionality. It supports the MDB standard and thus facilitates flexible payment connections. It also boasts ergonomically designed components, a lockable bean container and a water tank. Coffee lovers will enjoy the X4's intuitive operation, not to mention the superb coffee it serves.

This professional automatic coffee machine is an eye-catcher in any self-service area, open-plan office or caterer's counter. The X4 focuses entirely on black coffee specialities and is the perfect addition to any professional setting where up to 100 cups of coffee are served each day.

Main features

- Professional Aroma Grinder (P.A.G.2) for consistent grinding results and longer service life thanks to the rest mode function
- 3.5-inch display and six one-touch buttons for an optimal user experience
- Supports the MDB standard and facilitates connection to payment systems or use of the free Pocket Pilot 2.0 software from JURA

Accessories and add-ons

The optionally available MDB interface system 2.0 from JURA* enables the user to connect their machine to a widely used payment system. Pocket Pilot 2.0 is another interesting option. The free software from JURA combines contactless payment with an accounting and management system in a user-friendly, web-based tool.

* available as an accessory

- The 3.5-inch display with preset buttons ensures intuitive operation.
- Protected against external influences: The bean container can be locked, as can the water tank.
- With the One-Touch Lungo function, americanos and lungos are flavoured with a characteristic note.
- The X4 stands for the premium enjoyment of black coffee specialities.
